SUMMARY

Software engineering student with experience in backend and full-stack development. Interested in backend systems, scalable architectures and reliable web applications.

PORTFOLIO

- <https://www.gavintjin.nl>

SKILLS

- Problem-solving
- Team collaboration
- Communication

EDUCATION

Software Engineer

HBO ICT

Hogeschool van Amsterdam,
Amsterdam

09/2023 - 07/2027

Software developer

MBO niveau-4

Grafisch Lyceum Utrecht,
Utrecht

08/2020 - 07/2023

LANGUAGES

- Dutch - Native
- English - Intermediate (B1)

TECHNICAL SKILLS

- **Programming languages:** Java, PHP, Python, HTML, CSS, JavaScript, TypeScript, C#
- **Frameworks & libraries:** Spring Boot, Symfony, React, Vue.js, Lit, Unity, Playwright, Fastify, NestJS, Angular
- **API & Validation:** Swagger (OpenAPI), Postman, Zod
- **Database & ORM:** PostgreSQL, MySQL, Prisma, Hibernate, Doctrine
- **DevOps & Deployment:** Git, CI/CD, Docker, Railway, DigitalOcean (VPS hosting)
- **Testing:** Unit Testing, Cypress (E2E), Integration
- **Methodologies:** Agile, Scrum

EXPERIENCE

09/2025 - 12/2025

Software Developer Intern

Classic Car Ratings | Amsterdam

- Developed web scrapers for car auction websites using TypeScript and Python with Playwright and Puppeteer
- Contributed to a generic scraping platform for collecting auction data across multiple websites
- Worked within a monorepo architecture consisting of an API, web application, worker services, and shared packages for a distributed scraping platform
- Implemented the lot-links worker responsible for collecting auction lot URLs through pagination scraping
- Integrated scraping results with a Fastify backend API and PostgreSQL database
- Designed configuration-based scraping jobs to support different auction website structures
- Built backend API features using Fastify with Zod validation, JWT authentication, and Swagger (OpenAPI) for API documentation and testing

09/2024 - 02/2025

Student assistant

Hogeschool van Amsterdam | Amsterdam

- Supporting students with programming assignments
- Answering technical questions
- Reviewing code and assisting with debugging

08/2022 - 04/2023

Software Developer Intern

Canvasheroes | Amsterdam

- Contributed to ongoing development projects within the team
- Implemented backend endpoints and assisted with API development
- Worked within an existing codebase and collaborated with developers on small features and fixes
- Participated in team discussions and Agile development processes
